(57) Abstract :

A NANOCATALYST AND PROCESS FOR SYNTHESIS OF a-AMINO PHOSPHONATES USING SAID CATALYST The present invention provides a novel nanocatalyst $\text{NaAlSi}_2\text{O}_3$ and process for synthesis the same. Furthermore it provides one-pot synthesis of a-amino phosphonate compounds using said nanocatalyst. Described process herein is an easy and straightforward which saves energy, avoids time consuming purification steps, reduces costs and provides better yields as compared with those a-amino phosphonate compounds obtained through the traditional stop-and-go approach. The a-amino phosphonate compounds is selected from the compound of formula I and formula II.

Australian Government

IP Australia

CERTIFICATE OF GRANT INNOVATION PATENT

Patent number: 2021106339

Term of Patent:

Eight years from 21 August 2021

NOTE: This Innovation Patent cannot be enforced unless and until it has been examined by the Commissioner of Patents and a Certificate of Examination has been issued. See sections 120(1A) and 129A of the Patents Act 1990, set out on the reverse of this document.

Dated this 10th day of November 2021

Commissioner of Patents

PATENTS ACT 1990

The Australian Patents Register is the official record and should be referred to for the full details pertaining to this IP Right.

Extracts from the Patents Act, 1990

Sect 120(1A) Infringement proceedings in respect of an innovation patent cannot be started unless the patent has been certified.

Sec 128 **Application for relief from unjustified threats**

- (1) Where a person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings a person aggrieved may apply to a prescribed court, or to another court having jurisdiction to hear and determine the application, for:
- (a) a declaration that the threats are unjustifiable; and
 - (b) an injunction against the continuance of the threats; and
 - (c) the recovery of any damages sustained by the applicant as a result of the threats.
- (2) Subsection (1) applies whether or not the person who made the threats is entitled to, or interested in, the patent or a patent application.

Sec 129A **Threats related to an innovation patent application or innovation patent and courts power to grant relief.**

Certain threats of infringement proceedings are always unjustifiable.

- (1) If:
- (a) a person:
 - (i) has applied for an innovation patent, but the application has not been determined; or
 - (ii) has an innovation patent that has not been certified; and
 - (b) the person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings in respect of the patent applied for, or the patent, as the case may be; then, for the purposes of an application for relief under section 128 by the person threatened, the threats are unjustifiable.

Courts power to grant relief in respect of threats made by the applicant for an innovation patent or the patentee of an uncertified innovation patent

- (2) If an application under section 128 for relief relates to threats made in respect of an innovation patent that has not been certified or an application for an innovation patent, the court may grant the application the relief applied for.

Courts power to grant relief in respect of threats made by the patentee of certified innovation patent

- (3) If an application under section 128 for relief relates to threats made in respect of a certified innovation patent, the court may grant the applicant the relief applied for unless the respondent satisfies the court that the acts about which the threats were made infringed, or would infringe, a claim that is not shown by the applicant to be invalid.

पेटेंट सं. / Patent No. : 352228
आवेदन सं. / Application No. : 931/MUM/2014
काइल करने की तारीख / Date of Filing : 21/03/2014
पेटेंटी / Patentee : 1.DEHGHAN, Mohamed Hassan Gulamreza 2.BAWAZIR,
Abubakar Salam

प्रमाणित किया जाता है कि पेटेंटी को उपरोक्त आवेदन में बयांशकृत A TOPICAL ANTIMICROBIAL HERBAL FORMULATION नामक आविष्कार के लिए, पेटेंट अधिनियम, 1970 के उपबंधों के अनुसार आज तारीख 21st day of March 2014 से बीस वर्ष की अवधि के लिए पेटेंट अनुदान किया गया है।

It is hereby certified that a patent has been granted to the patentee for an invention entitled A TOPICAL ANTIMICROBIAL HERBAL FORMULATION as disclosed in the above mentioned application for the term of 20 years from the 21st day of March 2014 in accordance with the provisions of the Patents Act, 1970.

(57) Abstract :
Diabetes is a medical condition that affects the body's ability to process blood sugar, also known as blood glucose. It affects many parts of the body like eyes, kidneys, liver, feet. Eye exams are very important for diabetics because retinopathy can cause no symptoms at first, so it is important to detect the early signs. A foot exam once or twice a year (or at each doctor's visit) can help detect unhealed ulcers and poor circulation. Early detection of foot and eye problems in diabetes can be very helpful for your doctor to prescribe the right treatment. If left untreated, diabetes can cause many problems for your nerves, eyes, feet, kidneys, or other organs. Diabetes affects many parts of the body, including the eyes. A major concern for diabetic eye health is the development of a condition known as diabetic retinopathy. It forms when the blood vessels in the retina are damaged. The retina is a light-sensitive part of the back of your eye. This damage can cause blood vessels to thicken, close, clot, leak, or grow bacteria. In some cases, fluid can build up in the area of the retina that is used to perform essential tasks such as reading.

(57) Abstract :

The present invention has developed an inhalable dry powder formulation comprising Ivacaftor, L-salbutamol and ciprofloxacin loaded in L-leucine/BSA microparticles with both dissolution enhancement and superior aerodynamic properties for potential pulmonary delivery of a poorly water-soluble drug, ivacaftor for the treatment of lung infections like cystic fibrosis. The dry powder formulation exhibits adequate mucoadhesive strength, thus increasing the retention capacity and also has more than 85% of dose emitted dose percentage. Ivacaftor, L-salbutamol and ciprofloxacin loaded in L-leucine/BSA microparticles shows enhanced antimicrobial activity against *P. aeruginosa*.

(57) Abstract :

ABSTRACT The invention relates to synthesis and biological screening of novel N-4-(substituted aryl)-N-2-(4-chloropyrimidin-2-yl)-6,7-dimethoxyquinazoline-2, 4-diamines analogues of the general Formula A, their salts, hydrates, and pharmaceutical compositions. The invention also relates to the methods of preparation of the novel N-4-(substituted aryl)-N-2-(4-chloropyrimidin-2-yl)-6,7-dimethoxyquinazoline-2, 4-diamines analogues. Formula A

(57) Abstract :

The present invention provides herbal drug delivery system of Boswellic acid and its derivatives administered through oropharyngeal or nasal route with enhanced absorption and quick onset of action for the treatment and management of inflammation in a mammal. The drug delivery system is directed for systemic or local delivery of Boswellic acid. The herbal drug delivery system of Boswellic acid is effective in a number of inflammatory disorders such as inflammatory joint disease, Pulmonary inflammation, respiratory tract infection, chronic obstructive pulmonary disease, asthma, lung cancer, emphysema, acute respiratory distress syndrome, bronchitis, hyper inflammatory response due to SARS-CoV-2 causing coronavirus disease 2019 and the like.

(57) Abstract :

The present invention relates to a pharmaceutical chalcone derivative of Formula (I) and a process of preparation thereof. The pharmaceutical chalcone derivative of Formula (I) is an anti-cancer/anti-breast cancer compound having 50 to 75 % Epidermal Growth Factor (EGFR) inhibition at a concentration ranging from 10-100 µg/ml. The process for preparing a pharmaceutical chalcone derivative of Formula (I) of present invention is simple four steps process, wherein a chalcone is substituted with a heterocyclic organic compound in presence of an acid in ethanol at an ambient temperature.

(57) Abstract :

The present invention relates to a natural biodegradable drug delivery system composed of Pomegranate peel powder, which can be employed for delivery of drugs to patients in an optimized and well controlled manner. The invention further relates to a multifunctional excipient to be used in various pharmaceutical dosage forms. The multifunction of the excipient includes viscosity enhancer, binder and filler. The drug delivery system consists of a natural biodegradable polymeric matrix of pomegranate peel powder obtained from Pomegranate fruit i.e. Punicagranatum and belongs to a family of Punicaceae. The drug delivery system consists of homogeneous blend of pomegranate peel powder, gas generating agents and therapeutically active drug. The system is particularly well suited for delivery of therapeutically active drugs in a sustained and well controlled manner.

(57) Abstract :

The present invention provides novel hydroxamic acid derivatives. More particularly, it relates to novel hydroxamic acid derivatives as histone deacetylase inhibitors (HDIs) and process for synthesis thereof. The synthesised HDIs are biological active and used for treatment of cancer, preferably breast cancer. The said derivatives are represented by formula 1. [To be published with formula 1]

(57) Abstract :

A pharmaceutical preparation for the treatment of cardiac and cardiovascular disorders, such as hypertension, angina pectoris, cardiac insufficiency, cardiac arrest, heart attack and illness associated therewith, contains the active substance hydrochlorothiazide, or a pharmaceutically acceptable salt thereof, as well as pharmaceutically usual additives. Pursuant to present invention, it has been found that modified release composition containing the low soluble and highly permeable drug, hydrochlorothiazide, may be prepared which provided therapeutically effective plasma concentration of hydrochlorothiazide for a period of about 20 to about 24 hours covering the most risk period of cardiac arrest that is early morning hours and last phase of sleep. The modified release composition of current invention provides modified release of hydrochlorothiazide formulation of lower doses, which will reduce side effects of higher doses along with reducing dosing frequency for better patient compliance.

(57) Abstract :

This invention relates to a process of preparation of Clobetasol propionate comprising Steps- a) Betamethasone 17-propionate (stage-1) Charging Betamethasone in Dimethylformamide and P-toluenesulfonic acid at 10-15°C under Stirring & followed by addition of trimethyl ortho propionate/tributyl ortho propionate, further continued stirring at the same temperature for 3-5 hrs, the reaction was monitored for completion by TLC, reaction mass was quenched in purified water at 10-15°C, acidified with 2N H₂SO₄ up to pH=1.0-2.0, Solid isolated filtered, again washed with DM water, filtered the wet solid and suck dried completely, wet solid dried in tray drier at 50-55°C completely to stage-1 dry solid. b) Betamethasone 21-Tosylate (stage-2) Charging of Stage-1 in DMF under stirring and addition of p-Dimethylaminopyridine followed by addition of P-toluenesulfonyl chloride and reaction at 60-65°C, the reaction was monitored for completion by TLC, insitu used reaction mass for next step. c) Clobetasol propionate In insitu reaction mass added LiCl and continued stirring at the same temperature to remove tosylate group at 60-65°C to chloro group, monitored reaction completion by TLC, after reaction completion, quenched the reaction mass in ice water and material precipitated out, filtered, suck dried and washed with DM water, dried in oven to obtain Clobetasol propionate dry solid.

(57) Abstract :

The present invention relates to develop and evaluate steroidal lip balm of Methyl prednisolone to treat Glandular Cheilitis over lips. Another invention relates to preparation of steroidal lip balm by using suitable waxes and oils.
